

DOING THE RIGHT THING

20 and 30 by 2020

With the ever growing concern of global warming and human behaviors adverse impact on the environment, The Westin Boston Waterfront is looking at ways of making an impact in reducing energy and waste. In 2010, we announced our partnership with Conservation International where we as a hotel company, will “reduce energy consumption by 20% and emissions by 30% by the year 2020”. Our “20 and 30 by 2020” is the basis of The Westin Boston Waterfront’s sustainability plan. Our progressive environmentally conscious policies include the implementation of an extensive recycling program and mechanisms to reduce water and energy consumption, including the following:

THE WESTIN
BOSTON
WATERFRONT

Energy and Water Conservation

- High Efficiency Lighting
- Toilet & Urinal Efficiency
- Low-flow Showerheads
- Irrigation Standard Operation Practices
- Preventive Maintenance

Waste Management

- Recycling
- Dumpster Monitoring
- Hazardous/Controlled Waste Management
- Organic Waste Management
- Elimination of Styrofoam
- Environmentally preferred products
- Amenity Management
- Bottled Water Alternatives
- Sustainable Food & Beverage options

Indoor Environmental Quality

- Green Housekeeping
- Make a Green Choice Guest Program
- Integrated Pest Management
- Low Emitting Materials

Awareness and Engagement

- Green Council
